

Test in a Suitcase — portable testers

DSE Test Solutions has developed a range of solutions for harsh environments, including the wind and offshore industries. Our electronics and test equipment are integrated into portable suitcases specifically designed to provide maximum protection

These watertight, crushproof, and dustproof suitcases come in various sizes, shapes, and weights, allowing easy adaptation to customer requirements. They are designed with ergonomics and manual handling in mind, ensuring both protection and ease of use.

Our suitcases are designed as complete test solutions or modular units that can be seamlessly integrated into our customers' production setups.

DSE Test Solutions has in-house expertise to support all phases of projects involving suitcase-based solutions, from design to implementation. .

- ◆ Idea and Brainstorming
- ◆ Electrical design
- ◆ Mechanical design (3D)
- ◆ Software design
- ◆ Assembly and Manufacturing
- ◆ Test and Configuration
- ◆ Documentation
- ◆ CE-marking

Key features:

- ◆ Designed for harsh environments.
- ◆ Watertight, crushproof and dustproof solutions.
- ◆ Wide range of physical sizes and forms available.
- ◆ Ergonomic and designed for manual handling.
