

Production test systems...from idea to installation

-by use of advanced electrical test, data acquisition and data analysis

PCBA functional test - End Of Line test

DSE is a full service system integrator with inhouse engineering and own workshops. The concept of our test solutions is based on high-level software development combined with innovative electronics, instrumentation and mechanical fixture engineering.

When you partner up with DSE you get a scalable, highly specialized resource as a variable cost. This means that you can focus on your core business without worrying about documentation, CE approvals, delivery times and others. We have been making more than 1500 test systems over the last 30 years – deploying them worldwide.

With new projects you never start from scratch, but have a high offset point with well proven and stable solutions – saving you money and minimizing risks.

From idea to installation..... Let us assist with a solution, that gives you control of your quality:

- Up-to-date test technology
- Minimize risk factors
- Delivery on time
- Documentation
- Modular & scalable solutions
- Integration into your production setup
- Budget control
- Safe, ergonomic and CE certified

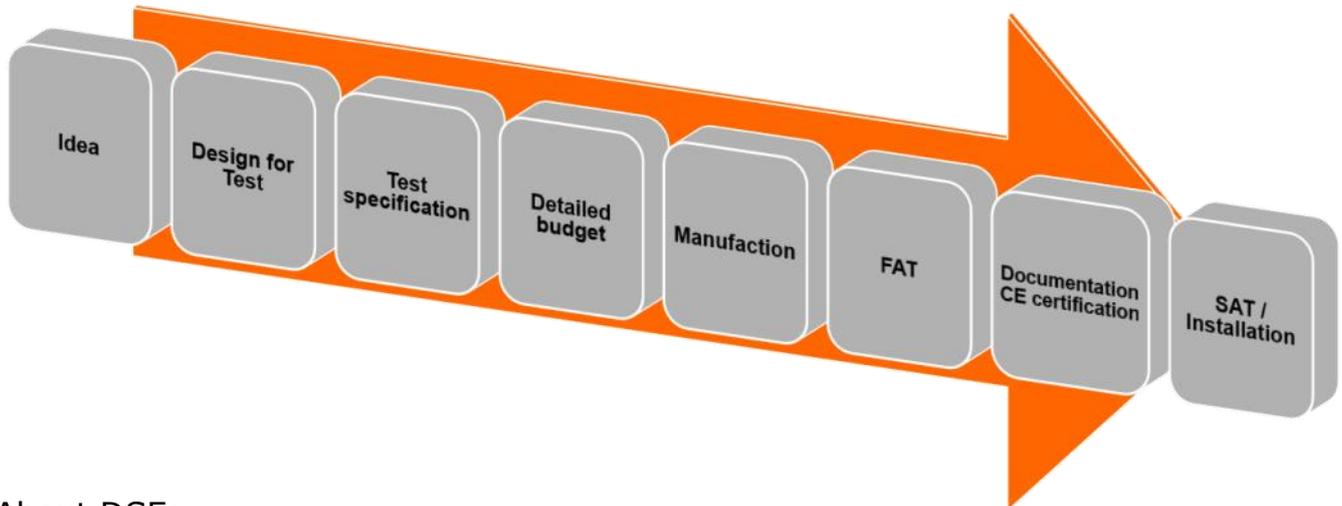

FLEXIBILITY UNDER CONTROL

Controlling all the design and manufacturing processes in-house for optimal flexibility and high quality.

We help you from idea to installation

DSE turnkey solution process model
