Danfoss Drives*

Case Danfoss Drives:

Automated PCBA Testing

Benefits for Danfoss Drives:

- **Scalable platform**, from simple manual operated testers to fully automated in-line testers, based on standard instrumentation and NI software.
- **Minimum floor space required**, for maximum testing efficiency.
- Fixture concept based on pneumatic fixtures and fixture PCBA's for optimized **wiring and maintenance**.
- Proven concept for decades of 24/7 operations, ensuring **stable and predictable test output** in the production.
